

SCHOODIC LAKE

Lakeview Plt., T4 R9, and Brownville Twps.,
Piscataquis Co.
U.S.G.S. Schoodic, Me.

Fishes

| | |
|-----------------------------|-----------------|
| Salmon | Round whitefish |
| Brook trout (squaretail) | White sucker |
| Lake trout (togue) | Minnows |
| Smallmouth bass | Cusk |
| | Stickleback |

Physical Characteristics

| | |
|--------------------------|-------------------|
| Area - 7168 acres | Temperatures |
| | Surface - 74° F. |
| Maximum depth - 188 feet | 150 feet - 46° F. |

Suggested Management

Schoodic Lake is superior in water quality characteristics for salmonid fishes. It is one of the deeper Maine lakes, and contains abundant dissolved oxygen at 150 feet.

Management should be for salmon, brook trout, and togue, the most desirable cold-water species present.

Liberalized fishing should be permitted for smallmouth bass and other competing warm-water species.
